Subject: Wildomar

Hello Stewart:

Thanks for your call the other day. I'm sorry we cannot attend the meeting on the 19th. I understand that ATSDR will be in attendance and Robert Knowles updated me and John Lyons last week on their engagement to date on this issue. Per my discussion with you, EPA can certainly review the final documents that DTSC and others at the State have assembled with regard to this site. I envision that the scope of EPA's review would be similar to what we are doing on Exide. Our review at this juncture would be a threshold review of whether the assessments and findings to date are complete or are missing elements that could significantly alter their conclusion. We would work closely with ATSDR on our review.

Thank you and good luck with the meeting.

Enrique

Hi Kathleen, 8:30 AM will work. Edward Nieto should have sent you the latest Interim Measures work plan and the public notice info. This info can also be found on the link below:

Subject: RE: Exide documents

Hello Rizgar,

We have reviewed the documents you directed us to and have a few questions we would like to discuss. I'm thinking the best thing would be to discuss these questions before or after our call that is scheduled for 9 am Wednesday. We could either start the call with a subset of the participants at 8:30 or continue after the call from 10 to 11. Overall we found DTSCs approach consistent with the EPA Lead Handbook, but had questions concerning confirmation sampling for the remediation, how the wind roses were used to determine which neighborhoods were sampled, and the sieving protocol. Let me know what works best for DTSC.

Regards,
Kathleen Salyer

Subject: Exide documents

Hello Rizgar,

Can you direct us to the key documents on the Envirostor website for Exide that will provide us a picture of the sampling strategy, protocols, results and cleanup strategy for the site? We noticed there are quite a few documents uploaded to the site. Can you also provide a technical staff contact that can answer questions from my staff? Thanks

Hello Stewart and Ray,
I would like to set up the call on Exide this week. Please let me know what time works for you as I am fairly flexible.
Looking forward to talking with you.

Thanks

Kathleen Salyer
Assistant Director, Superfund Division
Emergency Response, Preparedness and Prevention Branch US EPA Region 9 San Francisco, California

Subject: Exide Discussion

Hi John

Stewart asked me to assist with coordinating a meeting to discuss Exide. He said that Tuesday looked like the best day for you. If that is the case, then you may already know that Ray Leclerc will need to stand in for him as he is needed in Southern California for meetings. In order to coordinate this meeting, I will need to know who from EPA you would like to participate in the discussion. Will you please provide me their names. On Monday when I get in I will send out a meeting request. Also, it would be helpful to know how much time you feel is needed for the discussion and confirm that this is a telephone call and not an in-person meeting.

I'll look forward to hearing from you. Have a great weekend!

Lim Barnett

John –

Stewart is participating in out-of-town discussions, so he asked me to let you know that he will try to call you later today or tomorrow at 8 am. It's hard for him to step out of the meeting. It looks like you are out of town yourself. Is there a telephone number you would like him to call you on?
